KABIS™ III W

THE KIRTAS DIFFERENCE

The page images are captured using the latest Canon 30mp cameras in full 24 bit color in a fraction of a second; one for left-side pages and one for right-side pages. The images can be captured at 300dpi, or 400ppi or 600ppi resolution with superior sharpness and excellent color fidelity with superb dual LED lighting.

The new LIMB™ Image Processing software includes more automated features for faster, accurate image processing, with minimal intervention. When coupled with the OCR processing software, automated “image tagging” is possible creating valuable book structural metadata.

QUALITY BOOK DIGITIZATION

Quality results are the primary objective of any book digitization project. Quality includes superior images, high accuracy OCR, comprehensive metadata, and complete book integrity. Achieving this will allow you to use the book images to their fullest capability both now and for your future needs.

Do it once so they last forever.

The KABIS IIIW system continues the Kirtas tradition by providing the SmartCradle™ with new automatic book centering that increases post-processing productivity. The 110 degree position is optimal for low stress, gentle book positioning and ideal for fragile and rare books.

Air flows and the Enhanced Page Separator combine to achieve page separation and the latest SureTurn™ robotic arm and vacuum head will gently lift and turn the page. Within the vacuum head is our Page Edge Sensor technology to detect multi-page or no-page lift conditions and automatically take programmable corrective action. The result is full book content integrity and quality. The newest KABIS Manager Plus software provides a simple user interface so digitizing begins quickly. It is easy to learn and setup is quick for each book. All of the KABIS controls are integrated and the interface provides easy monitoring of page capture, quality control and management for accuracy.

KEY FEATURES

- Automatic and Semi-Automatic speeds from 400-2,890 pages per hour
- Capture images at 300 x 300 ppi or 400 x 400 ppi, or 600 x 600 ppi true optical
- Patented SmartCradle dynamic book handler, with automatic centering
- Low-stress support for rare, fragile documents
- Robotics that are gentler than the human hand
- SureTurn robotic arm lifts and turns each page
- Page Edge Sensor ensures only one page is lifted
- Digitize 3 & 4 ring notebooks and spiral bound
- LIMB™ retrieves available metadata and creates MARC, Dublin Core, MODS and METS files
- Output interpolation to 600ppi
- METS/ALTO Output w/LIMB™ & OCR Software
